Find the IP Address of an iPad

November 7, 2012 Rob iPad, 0

Sometimes it is useful to get to know your iPad IP address. From the IP address of your iPad, you will know which wireless router/network it is connected to, so you can change some settings on the router for your iPad.

How to Find the IP Address of an iPad?

To find out the iPad IP address is straight forward. You can follow bellow steps.

1. Tap on the Settings icon on the home screen of your iPad to start the Settings app.
2. Tap on Wi-Fi Networks from the Settings app.
3. Find the active Wi-Fi network name of the wireless router your iPad is currently connected to. Tap the blue arrow button next to the active network name.
4. You will find the iPad IP address as below:

In this example, we assume you use a DHCP address for your iPad. If your iPad is using a static IP address or BootP, you can tap those tabs to find the IP address of your iPad.

Knowing your iPad address could be helpful when you use our Wifi Transfer App to move around your photos and videos between iPad and computers directly, as the wi-fi transfer will establish a direct connection between your iPad and computer, you can make sure both devices are connected to the same router by knowing the IP address of your iPad and computer.

This instruction applies to different iPad models, iPad mini, iPad 3, iPad 2 and iPad original. They are basically the same for different iPad models and all iOS versions.
