Find the IP Address of an iPhone

November 17, 2012   Rob   iPhone,   0

Sometimes it is useful to get to know your iPhone IP address. From the IP address of your iPhone, you will know which wireless router/network it is connected to, so you can change some settings on the router for your iPhone.

How to Find the IP Address of an iPhone?

To find out the iPhone IP address is straight forward. You can follow bellow steps.

1. Tap on the Settings icon on the home screen of your iPhone to start the Settings app.
2. Tap on Wi-Fi Networks from the Settings app.
3. Find the active Wi-Fi network name of the wireless router your iPhone is currently connected to. Tap the blue arrow button next to the active network name.
4. You will find the iPhone IP address as bellow:

In this example, we assume you use a DHCP address for your iPhone. If your iPhone is using a static IP address or BootP, you can tap those tabs to find the IP address of your iPhone.

Knowing your iPhone address could be helpful when you use our Wifi Transfer App to move around your photos and videos between iPhone and computers directly, as the wi-fi transfer will establish a direct connection between your iPhone and computer, you can make sure both devices are connected to the same router by knowing the IP address of your iPhone and computer.

This instruction applies to iPhone 5, iPhone 4s, iPhone 4 and other iPhone models. They are basically the same for different iPhone models and all iOS versions.
