Find Transferred Photos and Videos on iPad 1

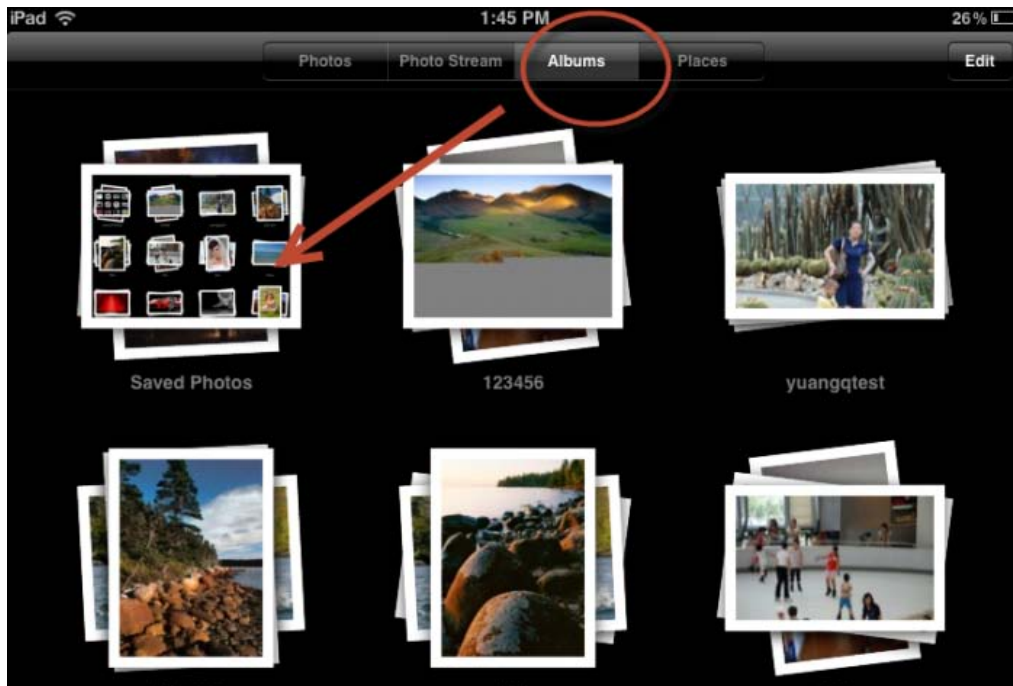

December 13, 2012 Admin iPad Transfer, 0

I have uploaded some photos and videos from my PC to iPad 1. Where can I find the transferred photos and videos on my iPad original?

Unlike the iPad 2 and newer models, the first generation of iPad or iPad 1 does not have a camera or Camera Roll album. When you use Wi-Fi Transfer App to send photos and videos from your computer to iPad 1, or from other iOS devices to iPad 1, the photos and videos will be saved to the Saved Photos album instead of the Camera Roll album.

To access the transferred photos and video on iPad one, tap Photos app on it, then click Albums, the Albums tab is the third one from left to right, the first tab is Photos, the second is Photo Stream. Once you open the Albums tab, you should see the Saved Photos album immediately, as the Saved Photos is the first album on the top left corner which stores all the received photos/video. See screen capture as below.
