## Transfer Photos from Computer to iPad Wirelessly

August 15, 2012 Admin iPad Transfer, Mac, 2

How to transfer photos from computer to iPad wirelessly?

You may have lots of photos or pictures saved on your computer hard disk. If you want to transfer photos from computer to iPad, you might firstly think of iTunes or other iPad transfer tools. As we all know that to transfer pictures from computer to iPad, one will need to connect the iPad to computer with a USB cable and sync the pictures and photos to iPad through iTunes. However it can be done much easier than before now with a wifi transfer app for iPad. So how to transfer photos from computer to iPad wirelessly? How does the wireless transfer actually work?

Socusoft has release a new Wireless Transfer App for iOS device owners. It works for iPhone, iPad and iPod, compatible with the latest iOS version.

If you want to transfer pictures from your computer to iPad, Socusoft Wireless Transfer App can help you conveniently transfer any photos from computer to iPad wirelessly and easily.

### Step 1: Install iPad Photo Wireless Transfer

First, you need to download this iPad photo wireless transfer app from Apple Store.

### Step 2. Run Wifi Photo Transfer app on iPad

You will get a URL address once the program launches on your iPad. You will need to keep the iPad photo wifi transfer app running during the whole process. Just remember to close it when we finish the step 3.

### Step 3: Transfer Photos to iPad Wirelessly

Don't bother to connect your iPad to PC via USB cable as all the job is to be done wirelessly through Wifi. Get the access URL address and browse your iPad photo library on your computer browser. Click the upload photos and videos button on the upper right corner to locate your local photo library on computer hard disk, then you can select the required photos and transfer photos to iPad wirelessly over Wifi.
