Transfer Photos from iPad to PC Over Wi-Fi

August 18, 2012 Admin iPad Transfer, 0

There are different ways to transfer photos from iPad to PC. If you want to know how to transfer photo from an iPad to PC using the Wi-Fi network, you are at the right place. In this iPad PC wireless transfer guide, we will discuss how to copy your iPad photos over to your computer through Wi-Fi.

Transfer Photos from iPad to PC via Wi-Fi

The procedure of photo transfer from iPad to PC is astoundingly simple and takes few minutes. You can simply follow below steps:

1. Download iPad to PC Wifi Transfer

Firstly you will need to download the iPad to PC Wi-Fi transfer app to your iPad through Apple App store. No installation on your computer required!

2. Connect your iPad and PC to the same Wi-Fi network.

If you do not have multiple routers at your place, your iOS devices should connect to the same Wi-Fi network automatically. Otherwise you might need to manually choose the Wi-Fi network for your iPad.

3. Run the iPad Photo Wireless Transfer

Run the photos iPad to PC Wireless transfer app on your iPad. You will get a local IP address through which your PC can access your iPad photos library.

4. Locate and access your iPad photo library from your PC

Open the web browser on your PC, type the above IP address in the address bar of your web browser on the computer. It could be Internet Explorer, Chrome, Firefox, Opera, or any other web browsers you have. Press Enter on

Transfer Photos from iPad to PC Over Wi-Fi

the keyboard, all photos and albums from this iPad's photo library will be listed on the Photo Wireless Transfer interface right on your PC browser.

After the Wi-Fi connection between your iPad and PC established, you can use the web browser on the PC to browse through photo library and albums on your iPad. Open the target photo album, you will find all photos listed as thumbnails.

5. Transfer photos from iPad to PC

Now it's time to pick up the photos from your iPad photo library and transfer to your PC over Wi-Fi. You can click the 'preview' to enlarge the photos; you can click 'Download original' to download pictures one by one; you can also select multiple photos or all photos in the album and download them as a compressed zip file. With this iPad to PC transfer tool, to copy photos from iPad to PC over the air is much easier than ever before.

Note:

All transferred iPad photos will be saved to the hard disc on your PC. After downloading the photos from iPad to PC, you will be able to find all the photos in the browser download folder through Windows explorer. The download folder may vary in different browsers. If you are IE, go to the Tools menu >> View Downloads; for Firefox, go to the Tools menu >> Downloads.

Now you know how to transfer photos from iPad to PC wirelessly over Wi-Fi without iTunes or a USB cable.
