## Transfer Photos from iPhone to computer Over Wi-Fi

August 20, 2012 Admin iPhone Transfer, 0

There are different ways to transfer photos from iPhone to computer. If you want to know how to transfer photo from an iPhone to a desktop or laptop computer using the Wi-fi network, you are at the right place. In this iPhone computer wireless transfer guide, we will discuss how to copy your iPhone photos over to your computer through Wi-fi.

### Transfer Photos from iPhone to computer via Wi-Fi

The procedure of photo transfer from iPhone to computer is astoundingly simple and takes few minutes. You can simply follow bellow steps:

#### 1. Download iPhone to computer Wifi Transfer

Firstly you will need to download the iPhone to computer Wi-Fi transfer app to your iPhone through Apple App store. No installation on your desktop or laptop required!

#### 2. Connect your iPhone and computer to the same Wi-Fi network.

If you do not have multiple routers at your place, your iOS devices should connect to the same Wi-Fi network automatically. Otherwise you might need to manually choose the Wi-fi network for your iPhone.

#### 3. Run the iPhone Photo Wireless Transfer

Run the photos iPhone to computer Wireless transfer app on your iPhone. You will get a local IP address through which your computer can access your iPhone photos library.

## 4. Locate and access your iPhone photo library from your computer

Open the web browser on your desktop or laptop computer, type the above IP address in the address bar of your web browser on the computer. It could be Internet Explorer, Chrome, Firefox, Opera, or any other web browsers you have. Press Enter on the keyboard, all photos and albums from this iPhone's photo library will be listed on the Photo Wireless Transfer interface right on your computer browser.

After the Wi-Fi connection between your iPhone and computer established, you can use the web browser on the computer to browse through photo library and albums on your iPhone. Open the target photo album, you will find all photos listed as thumbnails.

## 5. Transfer photos from iPhone to computer

Now it's time to pick up the photos from your iPhone photo library and transfer to your computer over Wi-Fi. You can click the 'preview' to enlarge the photos; you can click 'Download original' to download pictures one by one; you can also select multiple photos or all photos in the album and download them as a compressed zip file. With this iPhone to computer transfer tool, to copy photos from iPhone to computer over the air is much easier than ever before.

Transfer Tips:

All transferred iPhone photos will be saved to the hard disc on your desktop/laptop computer. After downloading the photos from iPhone to computer, you will be able to find all the photos in the browser download folder through Windows explorer. The download folder may vary in different browsers. If you are IE, go to the Tools menu >> View Downloads; for Firefox, go to the Tools menu >> Downloads.

*Now you know how to transfer photos from iPhone to computer wirelessly over Wi-Fi without iTunes or a USB cable.*
