Transfer Photos from iPhone to Mac Over Wifi

October 1, 2012 Admin iPhone Transfer, 0

There are different ways to transfer photos from iPhone to Mac. If you want to know how to send photos from iPhone to Mac using the Wifi network, you are at the right place. On this iPhone Mac wireless transfer tutorial, we will discuss how to copy your iPhone photos over to Mac using your Wi-fi network, no data cable, iTunes or iPhoto required!

Transfer Photos from iPhone to Mac via Wi-Fi

The procedure of photo transfer from iPhone to Mac is astoundingly simple and takes few minutes. You can simply follow bellow steps:

1. Download iPhone to Mac Wifi Transfer

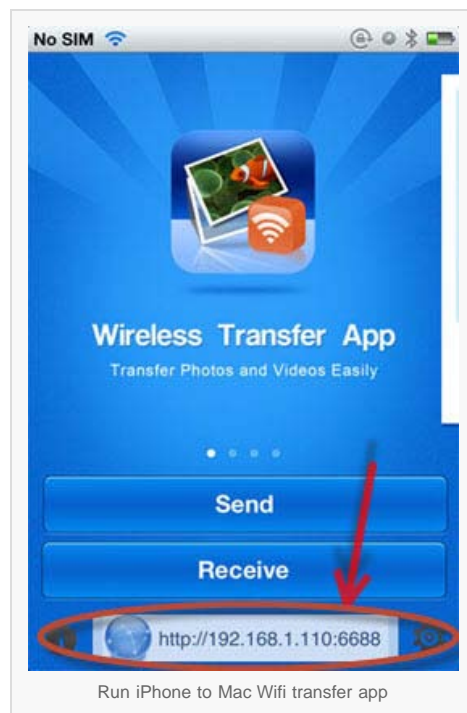

Firstly you will need to download the iPhone to Mac Wi-Fi transfer app to your iPhone through Apple App Store. No installation on your Mac required!

2. Connect your iPhone and Mac to the same Wi-Fi network.

If you do not have multiple routers at your place, your iOS devices should connect to the same Wi-Fi network automatically. Otherwise you might need to manually choose the Wi-fi network for your iPhone to the same as the Mac.

3. Run the iPhone Photo Wireless Transfer

Run the photos iPhone to Mac Wireless transfer app on your iPhone. You will get a local IP address through which your Mac can access your iPhone photos library.

4. Browse through your iPhone photo library from your Mac browser
