Transfer Purchased Videos from iTunes Store

January 3, 2013 Rob iPad Transfer, iPhone Transfer, 0

I cannot get my iPad to show my videos to transfer with Wireless Transfer App. I am trying to share videos that were purchased through iTunes and stored in 'videos' not photo's or Camera Roll.

Wireless Transfer App can only be used to transfer videos from Camera Roll or Photo Library. It won't be able to help you copy or transfer paid iTunes video content.

The wireless transfer app only recognizes my photos and videos taken with the device and not the ones downloaded or purchased from iTunes Store.

The wifi transfer can only provides access to the photos and videos stored on the 'Photos' app or Camera Roll. We believe it is part of Apple's strategy to encourage people to download movies/music using the iTunes store and not from other channels. Except Apple's native iOS apps, other third-party app can't access the videos data of 'Videos' App due to Apples' restrictions. So Wireless Transfer App can not get videos from 'Videos' App.
