Transfer Video from iPad to iPhone Using Wifi

October 26, 2012 Admin iPad Transfer, iPhone Transfer, 1

What will you do if you want to send videos from iPad to iPhone? In this iPad video transfer guide, we will show you how to send iPad videos to iPhone wirelessly using your Wifi network.

iPad to iPhone Video Transfer Using Wifi

1. Download Wifi Transfer App and install it on to both your iPad and iPhone

With the same iTunes account, you only need to pay once and install on both your iPad and your iPhone.

2. Connect your iPad and iPhone to the same Wi-Fi network.

You may have multiple wifi networks available sometimes. In such case, you need to change the wifi connection to the same. Otherwise they will not able to communicate with each other through the local Wifi network.

3. Run Wifi Transfer App on both of them

There is nothing else you need to do on your iPad once you started the Wifi Transfer App on it.* The rest steps for the iPad video transfer are to be done on your iPhone. Now go to your iPhone and follow bellow steps.

*Since the release of Wi-Fi Transfer app V2.0, we have introduced a new privacy feature for iOS photo/video transferring, the Browse mode. When the browse mode is turned off on the source iOS device, you will need to select photos/videos on the source iOS device before downloading them to the target iOS device.

More about the [Browse mode feature on Wifi Transfer](#).

4. Access iPad Videos from your iPhone

Once you launched the Wifi Transfer on iPhone, tap the "Receive" button on your iPhone. Then you will find the iPad device name displayed on your iPhone. This iOS video wifi transfer app is able to auto detect any devices with the app running on them. Tap your iPad name, all photos and videos in the iPad's photo library will be listed right on your iPhone.

5. Transfer video from iPad to iPhone

We are almost done. This is the last steps for the iPad video transfer. Now select the videos your want to transfer to your iPhone. Tap the "Download" button, the selected videos and movies will be sent to the photo library in your iPhone.

Wait until the iPad video transfer from iPad to iPhone to complete. Normally it should be very fast as the transfer is between two devices in the local wifi network. Large video file transfer takes a while, especially when your network connection is unstable. When the video downloaded from iPad to iPhone, run the Photos App on your iPhone, you can find all the videos downloaded there. Now enjoy your iPad videos on your iPhone with ease!
