## Transfer Videos from iPad to Mac Over Wifi

October 5, 2012 Admin iPad Transfer, Mac, 0

There are different ways to transfer videos from iPad to Mac. If you want to know how to send videos from iPad to Mac using your Wifi network, you are at the right place. In this iPad Mac wireless transfer guide, we will discuss how to copy your iPad videos over to Mac using your Wifi network, no USB data cable or iTunes required!

### Transfer Videos from iPad to Mac via Wifi

The procedure of video transfer from iPad to Mac is astoundingly simple and takes few minutes. You can simply follow bellow steps:

#### 1. Download iPad to Mac Wifi Transfer

Firstly you will need to download the iPad to Mac Wifi transfer app to your iPad through Apple App Store. No installation on your Mac required!

#### 2. Connect your iPad and Mac to the same Wifi network.

If you do not have multiple routers at your place, your iOS devices should connect to the same Wifi network automatically. Otherwise you might need to manually choose the Wifi network for your iPad to the same as the Mac.

#### 3. Run Video Wireless Transfer on iPad

Run the videos iPad to Mac Wireless transfer app on your iPad. You will get a local IP address through which your Mac can access iPad videos directly over Wifi network.

#### 4. Browse through your iPad videos from your Mac browser

Open the web browser on your Mac, type the above IP address in the address bar of your web browser on the Mac. It could be Internet Explorer, Chrome, Firefox, Safari, or any other web browsers you have. Press Enter on the keyboard, all videos and albums from this iPad's photo library will be listed on the Video Wireless Transfer interface right on your Mac browser.

After the Wifi connection between your iPad and Mac established, you can use the web browser on the Mac to browse through video library and albums on iPad. Open the target video album, you will find all videos listed as
