Transfer Videos from iPad to PC Over Wifi

October 6, 2012 Admin iPad Transfer, 0

There are different ways to transfer videos from iPad to PC. If you want to know how to transfer video from an iPad to PC using the Wifi network, you are at the right place. In this iPad PC wireless transfer guide, we will discuss how to copy your iPad videos over to your computer through Wifi.

Transfer Videos from iPad to PC via Wifi

The procedure of video transfer from iPad to PC is astoundingly simple and takes few minutes. You can simply follow below steps:

1. Download iPad to PC Wifi Transfer

Firstly you will need to download the iPad to PC Wifi transfer app to your iPad through Apple App store. No installation on your computer required!

2. Connect your iPad and PC to the same Wifi network.

If you do not have multiple routers at your place, your iOS devices should connect to the same Wifi network automatically. Otherwise you might need to manually choose the Wifi network for your iPad. You can change iPad Wifi network from Settings >> Wi-Fi, slide to turn on wifi connection, choose a wifi connection from available networks.

3. Run the Video Wireless Transfer on iPad

Run the videos iPad to PC Wifi transfer app on your iPad. You will get a local IP address through which your PC can access your iPad video albums.

4. Locate and access your iPad video library from your PC

Open the web browser on your PC, type the above IP address in the address bar of your web browser on the computer. It could be Internet Explorer, Chrome, Firefox, Opera, or any other web browsers you have. Press Enter on the keyboard, all videos and albums from this iPad will be listed on the Video Wireless Transfer interface right on your PC browser.

After the Wifi connection between your iPad and PC established, you can use the web browser on the PC to browse
