Transfer Videos from iPhone to computer Over WiFi

October 26, 2012 Admin iPhone Transfer, 1

There are different ways to transfer videos from iPhone to computer. If you want to know how to transfer video from an iPhone to a desktop or laptop computer using the Wifi network, you are at the right place. In this iPhone computer wireless transfer guide, we will discuss how to copy your iPhone videos over to your computer through Wifi.

Transfer Videos from iPhone to computer via WiFi

The procedure of video transfer from iPhone to computer is astoundingly simple and takes few minutes. You can simply follow bellow steps:

1. Download iPhone to computer Wifi Transfer

Firstly you will need to download the iPhone to computer Wi-Fi transfer app to your iPhone through Apple App store. No installation on your desktop or laptop required!

2. Connect your iPhone and computer to the same WiFi network.

If you do not have multiple routers at your place, your iOS devices should connect to the same Wi-Fi network automatically. Otherwise you might need to manually choose the Wi-fi network for your iPhone.

3. Run the Video Wireless Transfer on iPhone

Run the videos iPhone to computer Wireless transfer app on your iPhone. You will get a local IP address through which your computer can access your iPhone videos library.

4. Locate and access your iPhone video library from your computer

Open the web browser on your desktop or laptop computer, type the above IP address in the address bar of your web browser on the computer. It could be Internet Explorer, Chrome, Firefox, Opera, or any other web browsers you have. Press Enter on the keyboard, all videos and albums from the iPhone will be listed on the Video Wireless Transfer interface right on your computer browser.

After the Wi-Fi connection between your iPhone and computer established, you can use the web browser on the computer to browse through videos and albums on your iPhone. Open the target video album, you will find all videos listed as thumbnails.

5. Transfer videos from iPhone to computer

Now it's time to pick up the videos from your iPhone video library and transfer to your computer over Wi-Fi. You can select multiple video clips to transfer at once. You will not lose the video quality after copying the videos from iPhone to your computer. With this iPhone to computer transfer tool, to copy videos from iPhone to computer over the air is much easier than ever before.

Important Note:

All transferred iPhone videos will be saved to the hard disc on your desktop/laptop computer. After downloading the videos from iPhone to computer, you will be able to find all the videos in the browser download folder through Windows explorer. The download folder may vary in different browsers. If you are IE, go to the Tools menu >> View Downloads; for Firefox, go to the Tools menu >> Downloads.

Now you know how to transfer videos from iPhone to computer wirelessly over Wi-Fi without iTunes or a USB cable.
