Transfer Videos from iPhone to Mac Over Wifi

October 27, 2012 Admin iPhone Transfer, Mac, 0

There are different ways to transfer videos from iPhone to Mac. If you want to know how to send videos from iPhone to Mac using your Wifi network, you are at the right place. In this iPhone Mac wireless transfer guide, we will discuss how to copy your iPhone videos over to Mac using your Wifi network, no USB data cable or iTunes required!

Transfer Videos from iPhone to Mac via Wifi

The procedure of video transfer from iPhone to Mac is astoundingly simple and takes few minutes. You can simply follow bellow steps:

1. Download iPhone to Mac Wifi Transfer

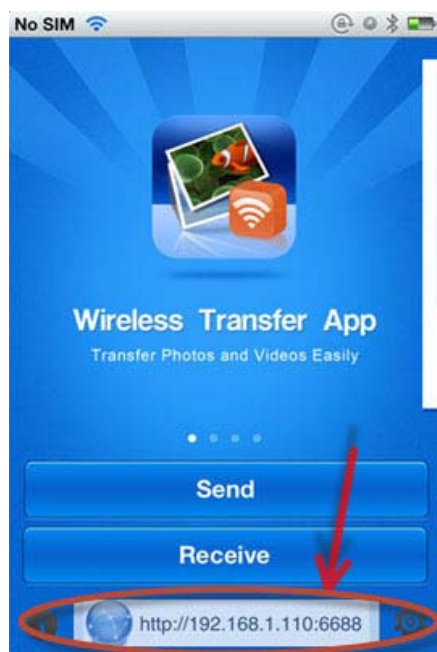

Firstly you will need to download the iPhone to Mac Wifi transfer app to your iPhone through Apple App Store. No installation on your Mac required!

2. Connect your iPhone and Mac to the same Wifi network.

If you do not have multiple routers at your place, your iOS devices should connect to the same Wifi network automatically. Otherwise you might need to manually choose the Wifi network for your iPhone to the same as the Mac.

3. Run Video Wireless Transfer on iPhone

Run the videos iPhone to Mac Wireless transfer app on your iPhone. You will get a local IP address through which your Mac can access iPhone videos directly over Wifi network.

4. Browse through your iPhone videos from your Mac browser

Open the web browser on your Mac, type the above IP address in the address bar of your web browser on the Mac. It could be Internet Explorer, Chrome, Firefox, Safari, or any other web browsers you have. Press Enter on the
